

Learning Reflection

I want to get a feel for where you guys are at on the learning scale and give me feedback on each project so I can improve them.

- ✓ Look at our scale for our weekly project on our assignment sheet.
- ✓ Open OneNote (not OneDrive but where we put the group project stuff).
- ✓ Go to your personal folder (not your group folder).
- ✓ Click on Learning "Reflection" then complete the below information...

Use this format to give me feedback:

Standard number and project name (from the learning scale)

Learning Scale-

Why-

Feedback on Project-

Anything missing you want to see?

Example of how it should look when you are done:

Standard 46.0 Art and Animation

Learning Scale- 3

Why- Because I was able to categorize art and animation software and use it to create a weapons model.

Feedback on Project- I hated the project because I am not artistic but I did learn how to use Blender.

Anything missing you want to see? I wish we could have been given the option of a few different tutorials instead of having to find our own.
