

## Install the Terrain Tools in Unity 2021

1. Click on the plus button in the top left corner of the Package Manager, then on “Add package from git url”.

2. Paste this into the URL field: `com.unity.terrain-tools` → click “Add”.
  1. If you are not able to install the preview package, enable this in the project settings.

Now you should see this in your project:
