

John Hopkin's Simulation Center Field Trip

Who: Tech High Game and Simulation Students

Cost: \$6.00 (bring money for lunch- they have an onsite cafeteria)

Date: May 10, 2018

Time: 8:15 AM-12:30 (arrive here 1st period, return to home school after 7th period)

Location: John Hopkins: 501 6th Avenue South, St. Petersburg, FL 33701 (bus provided)

Only 40 students can attend this field trip. The first 40 students who turn in their money and meet grade and attendance requirements will get the opportunity to attend.

What will we do?

Students will get to visit two areas of John Hopkins Simulation Center. You will get a tour of the actual simulation center to see the simulators in action as well as take part in a presentation showing a PC simulation game used to train Army doctors, which was created using Unity!

Melissa Powell who is an Advanced Education Specialist at John Hopkin's Simulation Center will give the presentation. Melissa is also a Gaming Advisory Committee member who helps make our program industry relevant!

What is Simulation?

In simple terms, a simulation is *a recreation of a real-world situation, designed to explore key elements of that situation*. With simulations and serious games, healthcare workers learn through real-world scenarios so they can make better decisions once they work with real patients.

About the John Hopkin's Simulation Center

The Simulation Center uses a multidisciplinary approach to simulation education and training. Our facilitators design learning experiences that support patient safety and learner psychological safety. Hands-on training introduces our learners to best practices in patient safety and quality of care and teaches them to think critically and solve problems in an environment that does not put the patient at risk.
